Title: Health Food

Claims:

1. A health food having a cod-liver oil extracted from ocean sunfish as a main ingredient, said health food is obtained by filling oil and fat in which the cod-liver oil includes an antioxidant into an encapsulating material.

.....

Detailed Description of the Invention

[0001]

The present invention relates to a health food which has a good physiological and pharmacological effects, said health food containing a large amount of DPA (docosapentaenoic acid) in addition to EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid) which are highly unsaturated n-3 type fatty acid.

[0009]

[Means for solving the problems]

The health food according to the present invention is characterized in cod-liver oil as the main ingredient extracted from ocean sunfish, and being obtained by filling oil and fat in which the cod-liver oil includes an antioxidant into an encapsulating material. The antioxidant is vitamin E and the like. The encapsulating material is, for example, gelatin, glycerol and the like. The cod-liver oil is encapsulated into capsules of the encapsulating material.
